THE ISSUE

It is estimated that about 20% of total marine plastics comes from sea-based sources such as fisheries, shipping, recreation, oil and gas industry, and others. Plastic litter has devastating effects on our oceans, marine life and human health. Reducing and preventing marine plastic litter is vital to safeguard the sustainability of our oceans.

OUR SOLUTION

- Equip partner countries with knowledge and tools to initiate legal, policy and institutional reforms.
- Establish public-private partnerships to demonstrate best marine plastic litter management solutions.
- Engage women in tackling marine plastic litter.
- Facilitate regional and global partnerships between countries to have a greater impact.

IMPACT

- ✓ Partner countries are leading the change on national, regional, and global levels and enforcing international conventions and regulations on marine plastic litter.
- ✓ Private sector is committed to supporting marine plastic litter related initiatives.
- ✓ Marine plastic litter originating from the shipping and fisheries sectors is reduced.

Reducing and preventing sea-based sources of marine plastic litter
